

# **Christopher Wright, MD**

255 W. Spring Valley Avenue  
Maywood, NJ 07607  
(201) 487-8866

## **Education**

---

- 08/2001- 05/2005      **University of Pennsylvania**, Philadelphia, Pa  
B.A in Biology, Magna Cum Laude
- 08/2006- 05/2010      **Rutgers University-New Jersey Medical School**, Newark, NJ  
Doctor of Medicine

## **Post Graduate Training**

---

- 07/2010-06/2011      **Rutgers University-New Jersey Medical School**, Newark, NJ  
Intern in General Surgery  
Chairman: Edwin Deitch, MD  
Program Director: Dorian Wilson, MD
- 07/2011- Present      **Rutgers University-New Jersey Medical School**, Newark, NJ  
Resident in Urology  
Chairman/Program Director: Mark Jordan, MD

## **Honors and Awards**

---

- 2001      **North Jersey *Today* Paper Male Scholar Athlete Of The Year**
- 2003      **University of Pennsylvania Wrestling “Eleventh Man” Award**  
Presented to athlete who exhibits exemplary work ethic and dedication to  
improvement of himself and teammates
- 2012      **Golden Apple Award Nominee for Excellence in Teaching by a Resident**
- 2013      **Passaic Valley High School Scholar-Athlete Hall Of Fame Inductee**

## **Community Service/Volunteer Work**

---

Provide mentorship to undergraduate athletes wishing to pursue career in  
medicine

## **Membership in Societies**

---

- 2005-Present      **American Urologic Association**

## **Research Experience**

---

- 2003                    **Research Assistant, Unilever Research Inc.**  
Skin Bioscience Group, Mentor: Dr. Susanne Iobst  
Responsibilities included developing an organ culture model using pigskin to mimic human dermal tissue. The techniques used to develop and test the model included Western Blotting, RNA isolation of clinical and organ culture samples, organ culture, protein quantification, and immunohistochemical techniques.
- 2009-2010            **Research Assistant, Rutgers- NJMS Division Of Urology**  
Mentor: Dr. Mark Jordan  
Investigated role of prostaglandin receptors in prostate cancer and the role of overexpression in the pathology of the disease. Cell culture models were developed to investigate receptor knockouts as a potential target for therapy.
