

DISCLOSURE OF FINANCIAL INTEREST

Dear Patient:

As part of your care at the New Jersey Urology, LLC (NJU) you are being seen by one of our Radiation Oncologists for a consultation to evaluate the full range of appropriate treatment options for you, including active surveillance. One option our Radiation Oncologist will consider is whether you are an appropriate candidate for image-guided, intensity-modulated radiation therapy (IG-IMRT).

The purpose of this Disclosure Notice is to inform you that the New Jersey Urology, LLC owns and operates NJU Cancer Treatment Centers. The Centers are part of our medical practice, and it is licensed to operate IG-IMRT equipment. The Urologists who are the owners of NJU have a financial interest in the medical practice, including the Center and the IG-MRT equipment.

You may, of course, seek treatment at a health care service provider of your own choice. You will not be treated differently should you choose an alternative treatment center.

Please feel free to ask your physician any questions you might have about his or her recommendations for treatment options. Please know that we will respect your choice of treatment, including where you choose to have treatment, and we will always act in your best medical interests.

By signing this disclosure you or your legal representative, acknowledge that you have been informed of the financial interests of the practitioners in this office.
